

Business Analyst (Aarhus, Denmark)

Do you possess strong analytical skills? Would you like to become part of a young and successful organization operating in one of the fastest growing industries in the world? If so, help us to meet our ambition to become the world's leading advisory firm within the renewable energy field.

From our offices in Denmark, the U.S., and China, MAKE Consulting provides clients worldwide with independent, professional advice about the wind industry. We consult our clients through market entry strategies, supply chain assessments, and M&A projects, serving customers spanning the entire value chain: manufacturers of components and wind turbines, utilities, and financial investors. We also publish research products to a wide range of subscribers who wish to stay abreast of the latest developments in the industry. In all our work, we rely on the integrity, insight, experience, and skills of our analysis team, and we are currently seeking a talented and highly motivated Business Analyst to join our office in Aarhus, Denmark.

Primary Duties

As a Business Analyst, you will be involved in both advisory projects and market research. Specific tasks include:

- Primary desk and field research in order to build and maintain MAKE's up-to-date knowledge base of the wind industry, its drivers and future development;
- Processing and analysis of collected data and information;
- Clear and insightful communication of findings, through research notes, reports, presentations, and other deliverables; and
- Participation in collaborative advisory projects.

Candidate Profile

Exceptional skills in both qualitative and quantitative analysis are expected. Crucial competencies include the ability to identify and focus on key underlying issues and trends extracted from large data sets and to marshal facts to support analysis and findings. Furthermore, it is important that you are a self-starter, work efficiently, and possess the necessary drive and determination to learn new skills and develop your knowledge of a dynamic field.

Relevant education at the master's level within economics or business is expected, as well as some experience in business analysis or consultancy. Knowledge of one or more sectors of renewable energy or energy industry is preferred.

Exceptional communication skills and professionalism are mandatory to serve our client portfolio that includes many of the leading companies within renewable energy.

Fluency in both oral and written English and comfort working against deadlines are essential to MAKE's suite of services.

Adding value to your renewable energy business
